

TOTAL WASH SYSTEMS

TECHNOLOGY DRIVEN  ENVIRONMENTALLY FRIENDLY

YOUR GEAR STINKS!!

Who is Total Wash Systems....

We are a local Atlanta-based Sports Gear & Equipment cleaning company utilizing the Esporta cleaning system. Esporta is the most advanced cleaning & sterilization system in the world, using hydraulic pressure and Green detergents to sterilize soft goods, protective gear, and sporting equipment. The Esporta Wash System cleans up to 160lbs of laundry per wash to food grade clean, removing 99% of the organic and inorganic contaminants. In our humble opinion, it's the most effective washing solution available today, and arguably, one of the most significant breakthroughs in cleaning technology in over 80 years.

**** We reduce the chance for Staph and MRSA by 99.9997% with our SportWash service. ****

What we offer...

Full service for your players, coaches, and teams to get their sports equipment picked up, sanitized properly, and returned within 48 hours (or whenever needed). Either schedule a day to have us pick it all up at once, or have your players drop off their equipment at one of our many Gear Drops in the metro Atlanta area.

Why use Total Wash Systems....

Our Wash System gets your teams equipment to the highest level of sanitization possible, since brand new. We know you need your best players on the field to be successful, getting sick from Staph infection, can be detrimental to a team. We also know you need your equipment back fast. We have the ability to turn around an entire team of 100 players in about 48 hours. Your players equipment smells awful and you don't even want the gear bag in the locker room, house, vehicle, or even the garage. Getting the odor out is only one advantage, how about the germs and bacteria that have been building up? That awful smell represents the bacteria and contamination build-up on the equipment. The porous nature of equipment combined with the warm, wet environment makes it an excellent breeding ground for mold, fungus, escherichia coli (E. coli) and staphylococcus (Staph) bacteria. Over the last decade, there have been many strains of the drug-resistant MRSA bacteria that have been passed from person-to-person, with the original reports happening with sports teams. There are examples at every level of sports from Pro Teams to High School Teams and all the way down to the beginner Rec programs of athletes getting infected with MRSA.

Why even take the chance on contracting a disease from your equipment?

Get it cleaned for minimal costs and get it done regularly. Washing your equipment twice a year has proven to reduce germ exposure and guarantee a healthy team. Regular cleanings have also proven to decrease wear and tear on the equipment, and help it to last a few additional seasons / years.

Leagues, Programs, Teams....

We offer discounted pricing for Team Sales and even larger discounts for Leagues & Programs that want to clean it all at once. Contact us for details, pricing, discounts, etc. We offer Post Game pick-up service and delivery within 48 hours for your next practice. How about end of season cleaning prior to storage? We do that too.... Call for details & pricing.

Simple: we kill the potential for Staph and MRSA and thanks to the highly concentrated cleaning the sanitization lasts longer, keeping your athletes healthy, and helping your equipment last longer!
